Citizen Tree

Support

You can support Citizen Tree projects by choosing one of three donation amounts. You can indicate your preference for a particular project but please be aware that all projects are funded from the same pot on an as-needed basis. As such, your preference will help us to publicly acknowledge the projects that have struck a chord with the public and generated significant awareness or monetary support, but your donation may not flow directly to your indicated project.

If you really want to get involved to support a specific project, please contact us to discuss how you can help.
